

Speed Humps

Speed humps provide a cost-effective solution to traffic management and road safety by reducing speed at car parks, shopping centres or factory complexes.

Our humps are modular in that they can be installed side by side to create any length and are flexible with end caps in case they are not run curb to curb.

Industrial Rubber Fenders

Industrial Rubber Fenders provide maximum cushioning protection against vehicles or trolleys damage to loading docks, buildings, corridor columns and corners.

Inflatable Truck Dock Shelters

Inflatable Truck Dock Shelters are especially designed to provide complete access for trailer openings, even in problem dock areas such as sloped and difficult driveway approaches. The shelter creates a seal that blocks out bad weather, insects, dust and dirt, while saving money on energy costs.

INNOVATIVE HIGH TRAFFIC INDUSTRIAL DOORS

HIGH TRAFFIC INDUSTRIAL DOORS OPTIONS

There are a variety of doors which act as environmental barrier and allow visibility, can withstand heavy traffic flow, and ideal for all industrial and commercial application.

PVC Strip Curtains

PVC Strip Curtains are economical, hygienic, durable and of high quality, help save energy, ensure workers' comfort and safety, protect valuable products and equipment in virtually any industries. It provides an outstanding clarity, which provides the added safety of a less obstructed view. Superior rounded edges helps prevent snagging clothes or products and eliminates sharp edges that might harm personnel as they pass through the door. Special aluminium "Flexi-Roll" brackets are designed to fix the PVC strip to suit all installation.

up to 2m high x 2m width.

Flexible See-Thru Swing Doors

Flexible See-Thru Swing Doors are recommended for pedestrians and forklift traffic. Constructed from tough resilient PVC, unique free-hanging method of framing PVC, patented ball hinges, self-closing, fully welded drawn steel profile frame, they have proven to be the ideal answer for functional style dividers. Being completed and, if required, will remain open in the 90° position. It ensures a perfect seal under all conditions.

Roll-Fast Doors

Roll-Fast Doors are automatic vertical roll-up doors. When opened it provides clear unobstructed traffic flow with opening and closing speed up to 1.2 m/s. It is designed for frequent operation, reliable and need minimal maintenance. It can be operated manually during power failure. The doors are incorporated with all necessary safety features and control options. The panel is made of durable vinyl panel with clear vision section.

up to 4.75m high x 5m width.

Insulated Overhead Sectional Doors And Dock Levellers

Insulated Sectional Doors use totally C.F.C free polyurethane foam panel with wide range of stucco finish colours available. Doors are fitted with counterbalance spring assembly. It can be operated manually or electrically. Various track arrangement are available to suit individual application. All fittings like end caps, hinges and tracks are galvanneal.

Dock Levellers will allow your people and equipment to be more productive in moving goods and materials in or out of your own building by bridging the height difference between the loading dock and truck, allowing wheeled vehicles to be driven safely on and off the truck. The Dock Levellers can be fitted on or edge mounted and be operated hydraulically or mechanically.

up to 6m high x 7m width.
